DNP ID+ PASSPORT PRO

Looking for a Passport & Photo ID solution that's fast and accurate? Well, we have the perfect system for you! There's a clue in the name. Say what you see is our motto.

The DNP ID+ Fast photo system swiftly, easily and accurately produces all kinds of ID photos, including the all important coded Passports, in compliance with UK and EU requirements.

A quick return on investment

The current general street price of a Coded Passport Photo service is £13. This means that you will have paid for the system in just 138 Passport prints!

ID Photos have never been so quick and simple to produce!

Biometric functions automatically adjusts the photo to correctly meet specifications right from the start.

The compact size requires very little space and can easily fit on any table top.

Whilst this is a versatile system capable of quickly producing a wide variety of Photo ID's, it's in the area of Passport Photos where this system really excels.

The system is composed of DNP's tried and trusted Dye Sub ID 600 Photo Printer and a powerful yet simple to use touchscreen tablet with our intuitive ID+ software.

What makes this system better than others?

That's a great question and one we're very happy to answer.

The worst scenario with supplying a customer with a coded passport service is if they get home and try to finish their application only to find out that their photo has been rejected for any one of a number of reasons.

You then have an unhappy customer who will need to contact you, maybe return to the store to have the photo re-taken and the awkward question of who pays for the new photos arises.

The DNP ID+ Fast system links directly into the UK Governments Passport system and offers a pre-approval or rejection notification, almost instantly!

Whilst this isn't a guaranteed approval, it would be unusual for the photo to then be rejected at a later date. So that nasty scenario of having a disgruntled customer is all but removed.

That extra pre-approval service is something you could even consider charging a premium for. "Would you like to go through pre-approval for an extra £1?"

How quick and easy is it?

It's a really simple 3 stage in-store process;

1. Select an ID type. Such as Passport, ID Card, Visa, Driver's License etc
2. Upload the photo to the system
3. Approximately 12.4 seconds later you will receive your Photo ID print

Some key features are exclusive to the DNP ID+ Fast system starting with the one we mentioned earlier

- UK epassport check: official UK government website access for picture compliance check from our ID+ software
- Print photos from camera or file
- Save both original and resized image
- Save to USB key, send to email

The only passport system that links directly into HM Passport Office!

Additional key features

- Instant biometric verification with 11 checkpoints
- Pre-configured templates available for 150 countries
- ICAO compliant ID photos (that's the International Civil Aviation Organisation if you were wondering).
- Automated software, no need for manual adjustments
- You can change the template without having to take another picture
- Possible manual correction to adjust colour, luminosity and contrast (you probably won't need to do this as the system takes care of most corrections automatically).
- Check, reprint or delete orders via the order history
- Each box of media contains enough to produce 350 6x4 prints.

Order your system now and open up a passport to profit!
